PROFESSIONAL SUMMARY

- Strategy analyst with three years across in-house corporate strategy and management consulting, spanning competitive intelligence, market modelling, and investment decision support.
- Core strengths in market-share modelling, scenario and macroeconomic forecasting, cost and options appraisal, and variance analysis, translating complex data into ranked strategic options.
- Builds the Excel financial and cost models behind business cases and brings the analysis to life in interactive Power BI dashboards.
- Trusted to facilitate executive workshops and author board-level reports and presentation decks for senior and board audiences.

PROFESSIONAL EXPERIENCE

Associate Consultant | NCS Australia — Technology Advisory Feb 2025 – Present

- Built the cost comparison model behind a business case appraising 5 content management systems against a utilities client's criteria, modelling upfront replatforming, three-year licensing, hosting and technology costs for each option, and summarised the options and recommendation in the final report to the client CIO. The recommended path was scoped at \$200,000 to replatform plus \$50,000 in annual running costs.
- Surfaced \$257,000 in forecast-to-actual spend variances across 19 teams on a client IT transformation program, investigating each discrepancy with the initiative owner and synthesising the findings into budget and process recommendations adopted across all 19.
- Partnered with NCS' Global Transformation Officer and National Strategy Lead to shape a \$90M-plus IT transformation program, defining scope, phased deliverables, dependencies and scheduling for the client's move to a new operating and delivery model.
- Facilitated 20+ workshops with executives and delivery teams to shape problem statements, analyse capacity requirements and co-design scalable operational roadmaps, improving decision-making and stakeholder alignment.
- Replaced static project and quarterly planning reports with interactive dashboards built using AI-generated VBA and in-house AI assistants with Microsoft Copilot, giving leaders visibility of workload and distribution across delivery teams and cutting editing time per report.

Strategy Analyst | Pacific National — Strategy & Competitive Intelligence May 2024 – Nov 2024

- Delivered 6 monthly competitive intelligence reports to executive leadership and the board, profiling 3 major competitors and applying macroeconomic scenario forecasting to bring rigour to strategic positioning decisions.
- Modelled current-state market share and performance across 4 national corridors, identifying the highest- and lowest-performing segments to define the opportunity set and prioritise expansion targets.
- Gathered competitor freight rate data and set it against internal yield and revenue-per-unit figures as inputs to that model, so segment performance could be read against what competitors were charging.
- Structured ambiguous demand forecasts into clear strategic options through market and macroeconomic scenario analysis, distilling complex data into board-level insight that informed business expansion strategy.
- Scoped, researched and wrote a strategic report on Australian grain exports for the Executive of Commodities in 2 working days, drawing on industry and government sources to set out national and international trends, blockers and forecasts.
- Built interactive Power BI dashboards and graphs for macroeconomic and strategic reports, giving executive and board audiences a clearer, faster view of the underlying analysis.

Undergraduate Consultant | BDO — Digital & Technology Consulting May 2023 – May 2024

- Facilitated 19 strategic workshops across all business units and the executive level to capture people, process and data requirements, shape problem statements and co-design a data strategy roadmap that stakeholders would adopt.
- Conducted primary research with internal stakeholders into customer needs and experience, analysing the findings to identify process improvement opportunities that contributed to measurable business outcomes.
